

## PREVENT SPLITS BEFORE THEY START

### NEW! SPLIT END REPAIR

**The Only In-Salon Service That Instantly Mend & Prevent Split Ends AND Prolongs The Shape of Your Cut.**

Utilizing a proprietary Thermo-Marine Bonding System™, this treatment fills in and binds broken hair fibers together, instantly mending split ends while a Brazilian Super Nutrient Complex prevents future breakage by surrounding each strand with a protective coating, defending against daily styling and environmental stressors.

**The end result is instantly repaired, stronger, healthier ends protected against future breakage.**

#### What to Expect:

1. Beginning with slightly damp, shampooed hair, the stylist will lightly dust the solution onto the bottom 2 to 3 inches of the hair.
2. Product will be combed through the ends to ensure each strand is coated with reparative nutrients to mend and seal where the cuticle is split or broken.
3. Next, the stylist will blow dry the hair as smooth as possible using a round boar bristle brush.
4. Finally, the stylist will flat iron the bottom 2 to 3 inches of the hair to lock in the product and seal the ends.

**Once the flat iron step is finished, the treatment is complete. There is no down time! You may wash your hair, exercise, put your hair in a clip, ponytail or bun without worry!**

#### SEEING IS BELEIVING!
